Product Attachent Api User Guide

Product response

Through the API call, you can obtain the specific product attachment that the admin has set in the backend.

- You must generate an admin Bearer Token key for authorization first.
- Using the provided API endpoint, you can retrieve the product response with a product attachment.

  Example : {{baseurl}}/rest/V1/products/**SKU**

  Note: SKU is required in the endpoint

  Method: GET

  End Point : {{baseurl}}/rest/V1/products/24-MB04

Response

- When filtering by particular SKU then this response is come.
